A Cloud based 340B Compliance Solutions

Fully Managed Hospital Pharmacy costs, contracts and compliance

Track all drug activity from the pill to the purchase to the patient to the payment — all from a single, SaaS-based platform solution designed to manage the full procurement cycle. RCTECH Solutions provides detailed tracking of all drug activity at the 11-digit NDC level for a complete audit trail and new insights into your pharmacy operations.

RCTECH Solutions Inc helps you:

> **find lower-cost alternatives** and nominally-priced items based on the NDCs you typically order

> **forecast your drug spend**

RCTECH Solutions Inc
a creative WEB and MOBILE solutions company

based on historical data and what-if scenarios

> **Locate and address pricing discrepancies**
> where the contracted price and invoice price don't
> match — or where the price you paid is higher than the
> national average for an NDC

> **Effective management of procurement and**
> **inventory** across multiple ordering platforms,
> wholesaler accounts and pricing contracts

> **Identify unmapped revenue items and**
> **resolve as** that can result in lost revenue and
> impact your bottom line

> **Detect drug cost** by monitoring the ratio of
> purchases to dispatch

> **Drill down your data** with robust and customizable
> reporting that helps you surface the most relevant
> insights

> **100% audit compliance** with a built-in audit
> tool and mock-audit assistance from our audit
> support specialists

> **Engage automated decision processes** guided
> by configuration options you choose based on your 340B
> program parameters

Flexible options — included at no additional charge

your drug spend by department
or account (340B, GPO or WAC)

Drug Cost Monitor Report:
Identify pricing discrepancies and
track resolution.

Drug Cost Analyzer: Analyze
current purchases, project drug
costs, and model what-if
scenarios

CDM and NDC Mapping
Reports: Pinpoint mapping and
ratio errors that could be
resulting in lost revenue

340B module features

Automated decision processes help ensure the configuration options you choose are applied consistently

Detailed eligibility checks help maximize your drug-cost savings according to your selected configuration options

A rules-based engine is configured to the options you select based on your current business needs and 340B program parameters

A complete audit trail, along with a built-in audit tool and dedicated audit specialists, helps keep you audit-ready, all the time

Flexible and robust reporting options help you analyze current and potential 340B savings

A variety of tools to maximize savings by alerting you to unmapped NDCs, nominally-priced drugs and lower-cost alternatives

Manage compliance concerns with specialized solutions designed for your peace of mind

Our compliance solutions are powered by RCTECH's rules-based engine, which drives automated processes to help enforce the configuration options you choose, based on the requirements of your organization's 340B program.

340B

340B Module: A simple split-billing solution may not deliver the level of 340B compliance required today. Our 340B Module helps you maintain a complete audit trail, so you're always audit-ready.
